Dashboard

View of your business

For those discerning managers who value time. Get a quick overview of critical areas of business such as sales, collections, payments, expenses and profitability presented in easy to understand graphical forms. Regularly measure your performance against budgets, track receivables and collections. It doesn't get easier than this!

Drilldown

To the specifics

View the numbers behind the dashboard to understand complex business drivers. Drill down from the dashboard all the way to specific territory or product line level to view relevant numbers. Move from current data to historic data.

Go beyond the limitations of basic spreadsheets and adapt to hierarchical structures of geographical territories and product groupings. Territories and product lines under performing are highlighted for easy identification.

The screenshot shows a detailed data table with columns for 'Financial Year', 'Period', 'Sales', 'Expenses', 'Collections', 'Profitability', 'TOTAL', 'Territory Hierarchy', and 'Product Hierarchy'. The table lists various categories like 'NORTH', 'SOUTH', 'WEST', 'UNCLASSIFIED', 'CASH SALES', and 'TOTAL' with corresponding numerical values. A legend at the bottom indicates 'Negative variance found at level below' and 'Less than budget'. The status bar at the bottom reads '© 2005, iBODE Technologies Private Limited. All rights reserved.' and 'Status bar'.

Experience

Business intelligence

Every company needs business intelligence (BI) to compete successfully. In the past, only large corporations with a substantial IT budget could afford BI software. ibode dLOGIC is set to revolutionize BI for smaller companies.

This surprisingly affordable software is a simple but effective desktop business intelligence solution ideal for small and medium enterprises. It is an 'out-of-the-box' solution which can be easily configured to suit your specific business in just a few minutes. Simple to install and use, it does not require any additional hardware or IT administration staff.

Simplify

Decision making

A number of small and medium sized companies have chosen to simplify their decision making by extracting value from day-to-day transaction data to make informed decisions. ibode dLOGIC allows you to import your transaction data from accounting systems such as Tally quickly to generate the reports and analysis. Ibode dLOGIC will measure, analyze and optimize business performance.

If you believe that you do not need to be big to be smart, get the power of ibode dLOGIC TODAY!

Special offer for Tally users. Call today for a demo
